TAPESTRY SEGMENTS

1A Top Tier
43,448 (22.3%) of households

The residents of the wealthiest Tapestry market, Top Tier, earn more than three times the US household income. They have the purchasing power to indulge any choice, but what do their hearts' desire? Aside from the obvious expense for the upkeep of their lavish homes, consumers select upscale salons, spas, and fitness centers for their personal well-being and shop at high-end retailers for their personal effects. Whether short or long, domestic or foreign, their frequent vacations spare no expense. Residents fill their weekends and evenings with opera, classical music concerts, charity dinners, and shopping. These highly educated professionals have reached their corporate career goals. With an accumulated average net worth of over 1.5 million dollars and income from a strong investment portfolio, many of these older residents have moved into consulting roles or operate their own businesses.

- These are the nation's wealthiest consumers. They hire financial advisers to manage their diverse investment portfolios but stay abreast of current financial trends and products.

3B Metro Renters
36,603 (18.8%) of households

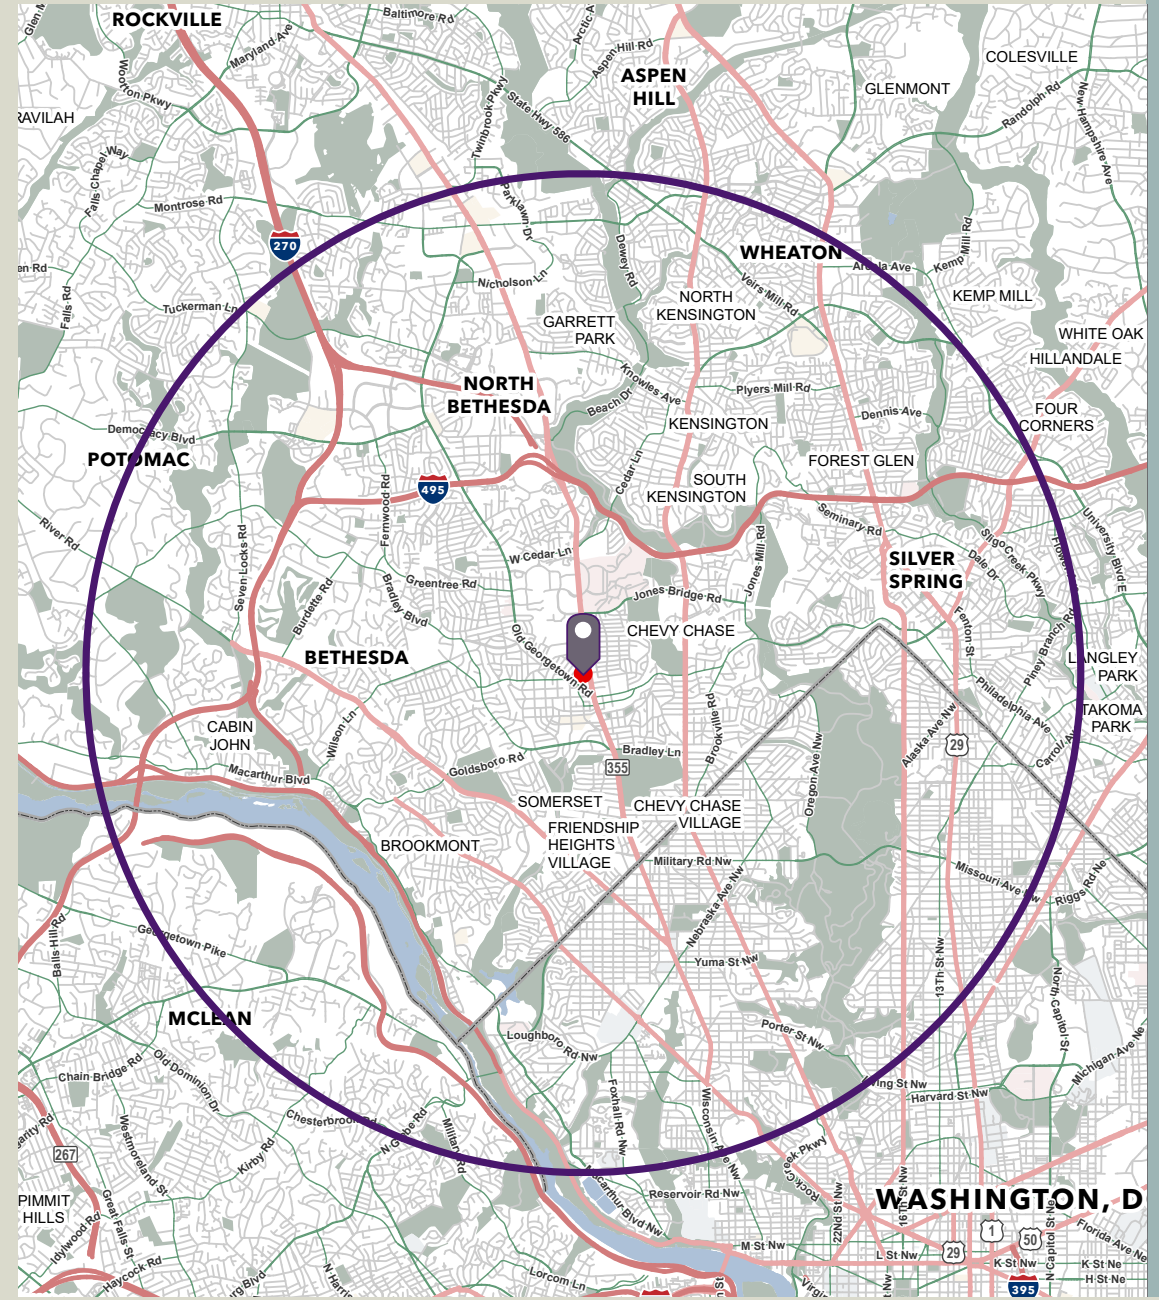

Residents in this highly mobile and educated market live alone or with a roommate in older apartment buildings and condos located in the urban core of the city. This is one of the fastest growing segments; the popularity of urban life continues to increase for consumers in their late twenties and thirties. Metro Renters residents income is close to the US average, but they spend a large portion of their wages on rent, clothes, and the latest technology. Computers and cell phones are an integral part of everyday life and are used interchangeably for news, entertainment, shopping, and social media. Metro Renters residents live close to their jobs and usually walk or take a taxi to get around the city.

- Become well informed before purchasing the newest technology.
- Prefer environmentally safe products.
- Socializing and social status very important.
- Very interested in the fine arts and strive to be sophisticated; value education and creativity.

3A Laptops and Lattes
28,712 (14.8%) of households

Laptops and Lattes residents are predominantly single, well-educated professionals in business, finance, legal, computer, and entertainment occupations. They are affluent and partial to city living—and its amenities. Neighborhoods are densely populated, primarily located in the cities of large metropolitan areas. Many residents walk, bike, or use public transportation to get to work; a number work from home. Although single householders technically outnumber couples, this market includes a higher proportion of partner households, including the highest proportion of same-sex couples. Residents are more interested in the stock market than the housing market. Laptops and Lattes residents are cosmopolitan and connected—technologically savvy consumers. They are active and health conscious, and care about the environment.

- These are health-conscious consumers, who exercise regularly and pay attention to the nutritional value of the food they purchase.
- Environmentally conscientious but also image-conscious: both impact their purchasing.
